IPG is one of the largest tape and packaging manufacturers in North America. Customers include Amazon, Boeing, Ford, GE, and many others.

The Research & Development Department for all IPG tape plants is located in Marysville. R&D investigates new technologies, designs and develops new products, improves existing products, and reverse engineers competitor products. There are abundant pilot manufacturing, testing capabilities, analytical instruments, and computer resources. R&D has employed a student program for over 20 years. Students perform various tests, collect data in lab notebooks, input data in computers, work on some special projects, etc. Past students have majored in a wide range of fields including chemistry, math, business, medical, teaching, and more.
